**4v5r9 (from 4v5r8) 19-Mar-2025**

**New Features/Mods:**

- Synchronise local & user column widths

**Fixes:**

- Change title bar style when changing focus

=====

## 4v5r8 (from 4v5r7) 21-Dec-2023

### New Features/Mods:

- Remember Column Widths
- Ignore case of firmware filenames when updating

### Fixes:

- None
- =====

## 4v5r7 (from 4v5r6) 17-Nov-2022

### New Features/Mods:

- Add support for "broadcast adapter" option
- Warn user if broadcast listen port is unavailable (if another program has not released the port)

### Fixes:

- None
- =====

## 4v5r6 (from 4v5r5) xx-xxx-2021

### New Features/Mods:

- Reset window position if it starts "off-screen"

### Fixes:

- Fix sorting on "I/O Firmware" column
  - Fix possible false "ip clash" if unit not yet seen
- =====

## 4v5r5 (from 4v5r4) 09-Nov-2021

### New Features/Mods:

- Show IP clashes in orange
- "Application Browser" dialog now uses built-in tree view to navigate
- "Application Browser" sort fixed (indicator arrow and case-insensitive)
- Last used "Update IO/Firmware" folders now remembered

- Alert user if unable to get Read Access on I/O or Firmware update file
- Allow "identify" of multiple local machines

#### **Fixes:**

- None

=====

## **4v5r4 (from 4v5r3) 18-Jun-2021**

#### **New Features/Mods:**

- Add support for P572/P577 boards
- Enhance support for P568 boards
- Increase default remote debug socket timeout from 5sec to 30sec
- Add "Copy Device ID" to context menu
- Add "Update" install option (which does a warm start)

#### **Fixes:**

- None

=====

## **4v5r3 (from 4v5r2) 05-Feb-2021**

#### **New Features/Mods:**

- "Strobe Ident Lights" & "Reconfigure" : use Broadcast for local units, IP for remote units
- Add support for P568
- Show app revision in version text
- When installing, hide any setups starting with '!' (BUGZ 1010)

#### **Fixes:**

- Fix timeout when using "Upgrade & Keep Totals/Constants" (BUGZ 1059)

=====

## 4v5r2 (from 4v5r1) 16-Mar-2017

### New Features/Mods:

- Backup asks for user to nominate a folder.

### Fixes:

- None
- =====

## 4v5r1 (from 4v5r0) 09-Mar-2017

### New Features/Mods:

- About box shows 4 lines for copyright and allows | for newline.

### Fixes:

- None
- =====

## Initial Release Note 4v5r0 06-Jan-2017

### *New Features/Mods:*

- Dropdown added to 'Install App' option to choose totals, etc.
- Firmware files not beginning with "CPU\_4v" are rejected from being installed.

### *Fixes:*

- None
